Subject: Final License Application Submittal
Re: FERC Project No. 12496, Lassen Lodge Hydroelectric Project

Dear Ken:

Rugraw, LLC hereby submits our Final License Application (FLA), for the proposed Lassen Lodge Hydroelectric Project, FERC Project No. 12496, in Tehama County, California as prepared by Tetra Tech consulting et al.

We have set up a secure document repository, Procore, and you and the service list will be getting an e-mail from the Procore System with a zip file of all of the documents, as well as an invitation to log in to view the documents online from any location at a later date.

It is our intent to reach the widest audience possible with this application to insure that all interested parties have an opportunity to comment on the proposed project. To that means, please let us know if there are any other agencies, groups or persons that you might suggest we distribute these documents for review and timely comment.

We look forward to working with you and your team to review the license application in detail.

We will be reaching out to set up meetings specifically on the fisheries studies and the diversion/fish passage design, but can meet on any topic as desired, to gather input to be incorporated into the final project design and license.

As always, please contact anyone on our Rugraw, LLC team or the Tetra Tech team, if you have any questions or comments.

Respectfully Submitted,

Charlie Kuffner
Managing Partner
Rugraw, LLC
